Research Foundation

The main scientific ambition:

To obtain a **global view** on the orchestration of cellular energy balance and damage control with focus on autophagy regulating pathways and their crosstalk with other cellular processes.

The main translational ambition:

To pinpoint the most appropriate steps of the autophagy pathway for **therapeutic intervention**.

CARD

CENTER FOR AUTOPHAGY, RECYCLING AND DISEASE

“Winning hand” is all about the people

I aim to create a **stimulating infrastructure** that **combines complementary expertise and state-of-the-art technology** of three internationally recognized research units at the *Danish Cancer Society Research Center* and **attracts the most talented and ambitious scientists world-wide** to perform cutting-edge research.
